

INDICATIONS AND RECOMMENDATIONS

Transportation from/to the airport to the hotel

We recommended to use the Hotel's transportation service for greater safety and comfort. If you want to take other taxi cab options for transportation service, you can download the following apps from your Play store or App store:

You can also contact the following transportation services that are available at the airport before the migrations exit gate: <https://www.lima-airport.com/cms/pasajeros/transport/taxis>

Transport	Phone	Webpage

Weather

We are currently experiencing the El Niño phenomenon, so the temperature and wind chill present variations outside the usual ranges. The month of September is a spring month and the temperature oscillates between 18°C and 23°C. Due to this erratic variation of the weather, we suggest you consult the following link: <https://www.senamhi.gob.pe/?p=pronostico-meteorologico>.

Electric power plug type

Peru uses 220 volts with a 60Hz AC as its power source. There are two types of power plug type in Peru. One accepts two-prong plugs with parallel flat blades, while the other has plugs with two round pins.

Security and Health

Each participant is responsible for their belongings. Do not carry a lot of cash or valuable belongings with you. Always carry your identification and the details of the hotel where you are staying with you.

Currency exchange

Please ask at the front desk of the hotel information about exchange houses. We leave you a referential rate: <https://www.oanda.com/>

Lodging

We recommend to ask about the check-in and check-out time of your respective hotels. Ask about the luggage storage service that they offer free of charge. To reserve your transfer service from/to the airport, please consult it or reserve it at the counter.
